

Ranbir Singh Narang

Software Engineering Lead · Toronto, ON

Summary

- Technical Lead with experience designing and developing high-volume backend systems supporting millions of users across customer-facing platforms.
- Strong background in distributed systems, microservices, and event-driven architecture, focused on building reliable and maintainable applications.
- Proven ability to lead and mentor engineering teams, contributing across system design, development, performance optimization, and delivery of production-grade software solutions.
- Hands-on experience designing and delivering enterprise Generative AI solutions, including RAG-based knowledge retrieval systems, using LangChain, OpenAI APIs, and vector databases.
